

HDb2600 Series

Scalable 1080p Encoder/ RF Modulator

For organizations looking for cost-effective HD encoding the HDBridge 2600 Series is the perfect fit. Choose from two or four channels models that allow you to deliver HD video up to 1080p resolution to an unlimited number of displays over almost any distance.

The HDBridge 2600 series converts high definition AV sources into an RF signal received a television's QAM (NA model) or DVB-T/C (EU model) digital tuner over coax cable. With its high 45 dBmV RF output, you can send your content to an unlimited number of displays over nearly any distance.

Multiple units can be combined to create a headend that supports over 100 channels on the RF network. This unit is designed primarily for high channel density environments where rapid deployment, advanced management, and compatibility are critical.
