

ZyPerUHD

Compressed 4K AV Over IP on 1Gb Networks

OVERVIEW

The ZyPerUHD platform allows for the easy distribution and switching of ultra high definition compressed video, audio, and other data signals using ZyPerUHD encoder and decoder modules and off-the-shelf 1Gb Ethernet switches.

SEND COMPRESSED VIDEO UP TO 4K, AUDIO, AND CONTROL OVER ETHERNET

ZyPerUHD delivers stunning pixel for pixel reproduction of compressed 720p and 1080p HD resolution content directly over a standard 1Gb ethernet network. ZyPerUHD eliminates the need to have a separate AV network or equipment for video and other AV content.

CHANGE SOURCES AND CONTENT INSTANTLY WITHOUT PROGRAMMING ZYPERUHD

IP based architecture enables you to quickly switch from one source to another with minimal loss of frames - even at 1080p resolutions.

CREATE AND MANAGE VIDEO WALLS UP TO 81 SCREENS

ZyPerUHD can be used on multiple screens to create a video wall up to 81 screens in a 9x9 configuration. The unit automatically scales and adjusts HD source content to create a compelling wall without any extra hardware or software. You can even mix scaled images with stand-alone screens.
